

### Career Objective

Passionate web developer driven to enhance skills and contribute to dynamic projects. Aspiring to become a full-stack developer, I am dedicated to continuous learning. Seeking opportunities to apply my expertise in front-end and back-end development for impactful contributions.

### Technical Skill

**Expertise** JavaScript | React | Tailwind | Express | Firebase | Mongoose | React query | NextUI | Rest Api  
**Comfortable** TypeScript | Next.js | Node.js | React Native | Redux Toolkit | JWT | Socket.IO | MUI | Supabase  
**Familiar** Postgres | Prisma | Fastify | Cheerio  
**Tools** VS Code | Git | Github | Netlify | Vercel | Canva | Figma | Postman  
**Interpersonal** Problem Solver | Quick Learner | Self Learner | Flexible | Collaborative

### Education

National University **Bachelor of Business Administration (BBA)**

2021-Present

### Projects

#### ChatCord - A Real-Time Chat App Using Socket.IO

[Live Link](#)

[Client Code](#)

[Server Code](#)

- A Socket.IO-based real-time chat application, empowering users to exchange text messages and share images for an enhanced messaging experience.
- Implemented MongoDB-backed JWT-based user authentication, ensuring a secure and personalized experience for users interacting with the chat platform.

**Technology:** Next.js, Socket.io, Mongoose, Express, JWT.

#### Pewdsflix - Anime, Movie, and TV Series Streaming Platform

[Live Link](#)

[Client Code](#)

- Enabling users to stream movies, TV shows, and anime with regularly updated, up-to-date content
- Integrated Supabase for enhanced user engagement, providing detailed profiles and watch history tracking.
- Netflix-inspired UI with a 'Continue Watching' feature, ensuring a familiar and user-friendly streaming platform.

**Technology:** React.js, PLYR, HLS.js, Supabase, NextUI.

#### Healthify - Diagnostic Center Management With Dashboard

[Live Link](#)

[Client Code](#)

[Server Code](#)

- Implemented a robust role-based JWT authentication system, ensuring secure access control for different user roles.
- Developed an admin dashboard for easy oversight of user management, medical tests, bookings, and comprehensive site analysis.
- Built a responsive UI with NextUI and optimized API management using Tanstack Query for seamless data retrieval and manipulation, enhancing overall application performance

**Technology:** TypeScript, React.js, TanStack Query, NextUI, Mongoose.
